## LightBox Future Cities Challenge Prizes for First and Second Place Teams

Best use of LightBox APIs to solve real world problems  
User Interface and / or Data Analytics  
Future Cities, Environment, Health Care, or Education  
Must Provide Working Demo and Code

### Access Property and Location Data where and when you need it

Whether you need access to precision location data or property intelligence, LightBox is the leader.

### All the Data You Want

LightBox brings together over 10,000 datasets on one easy-to-use platform.

### One Single Interface

Powerful, cloud-based REST APIs in a unified data model irrespective of who originally published the data or in what format.

### The Last API You'll Ever Need

LightBox abstracts away your need to handle multiple sources and ever-changing publication formats.

### Property Based

- Tax Parcels
- Structures
- Address Points
- Geocoding

### Environmental

- FEMA Flood (NFHL)
- FEMA Risk (NRI)
- Wetlands
- EPA Sites

### Boundaries

- Counties
- Census Tracts
- Block Groups
- Neighborhoods
- Zoning
- Opportunity Zones
